## SUMMARY

I am Shivaram Krishna, a dedicated and innovative developer with a strong foundation in programming and technology. With experience in languages such as C/C++, Java, Python, JavaScript, and PHP, I have developed several platforms and applications enhancing user experiences. I excel at integrating technologies like Firebase for real-time functionalities and enjoy creating seamless and engaging interfaces for various web applications as demonstrated in my projects.

## EDUCATION

### Bachelors in Computer Applications

AMEs Science Degree College

📅 09/2021 - 09/2024

### Pre-University Course

Justice Shivaraj Patil PU College

📅 2019 - 2021

## EXPERIENCE

### Intern

Zen Webnet

📅 06/2024 - 08/2024    📍 Remote

A digital marketing agency offering web design, development, and digital marketing services like SEO and SMM. Established in 2017, delivering cost-effective, high-quality solutions to clients worldwide.

- Contributed to Zen Webnet's digital services team, helping to increase **client lead generation by 30%** through optimized web design and marketing strategies.

## SKILLS

Java	Python	Javascript	React.js
DSA	PHP	Typescript	Firebase
Git	Github	JQuery	

## PROJECTS

### Skill Development Platform

📅 01/2024 - 03/2024

An upskilling platform for students to gain practical experience in fields like programming and more.

- Created an upskilling platform enabling students to gain practical experience through real-world microtasks.
- Implemented Firebase for authentication and real-time database functionalities.
- Designed and launched features for enrolling in challenges, submitting solutions, and tracking progress.
- Built an admin panel to oversee challenges and handle user queries.
- Integrated profile management functionalities, including profile picture uploads using Firebase Storage.

### Stock Trading Tournament Platform

📅 04/2024 - 06/2024

A web app for users to participate in stock trading tournaments.

- Engineered a web app for stock trading tournaments where users compete to top the leaderboard and win funding.
- Built key components, including enrollment, leaderboards, user guides, login/signup, and landing pages.
- Utilized Firebase for real-time data management and secure authentication.
- Designed a responsive user interface to enhance engagement.

### Chrome Extension

📅 08/2024

A Chrome extension which serves a random trivia every time a new window is opened.

- Developed a Chrome extension that opens a random trivia question with four multiple-choice options whenever users open a new tab.
- Leveraged the Open Trivia Database API to deliver fun and interactive learning experiences for users.
